

Design-Partner Program — Term Sheet Outline

Business-terms outline for the 6-month design-partner program. For counsel review before any use.

NOT A CONTRACT AND NOT LEGAL ADVICE. This is a business-terms outline to hand to counsel for drafting. Do not sign or circulate as an agreement.

1. Parties & Purpose

Siliconomics ("Company") and [Partner] enter a design partnership to deploy the Siliconomics platform on Partner's active silicon program(s), validate its models against Partner's internal analyses, and shape the product roadmap.

2. Term

- 6 months from effective date. Either party may terminate with 14 days written notice, no cause required.
- One 3-month extension by mutual written consent.

3. What Partner Receives

- Full platform access for up to 5 named users, at no cost during the term.
- Direct founder/CTO access: weekly 30-minute working session; same-day response channel.
- Assumption onboarding: Partner's own reference data loaded as private, partner-owned models.
- Priority consideration for feature requests arising from Partner's program needs.
- Price lock: first right to convert to an annual team license at \$36,000/year, held for 12 months from term end.

4. What Company Receives

- Weekly feedback session participation (30 minutes, program-level user).
- Executive sponsor attendance at one monthly review.
- Validation comparisons: Partner compares platform outputs to internal figures and reports deltas — without disclosing NDA-covered source data to Company.
- On conversion to paid: a case study and reference call; logo usage by separate written approval only.

5. Data Handling & Confidentiality

- Partner-entered assumptions and Builds are Partner's confidential information; tenant-isolated; never aggregated, benchmarked, or shared.
- Company never requests, receives, or stores NDA-covered foundry/vendor pricing. Validation is delta-based, not data-based.
- Demo/local mode processes data entirely in-browser with no server transmission.
- AI-advisor features transmit Build parameters to a third-party LLM API only on explicit per-use invocation; Partner may disable account-wide.
- Mutual NDA executed as a separate instrument; survives termination.

6. Intellectual Property

- Company owns the platform, models, formulas, and all improvements.
- Partner owns its data, assumptions, designs, and Builds.
- Partner grants Company a perpetual, royalty-free license to use feedback and feature suggestions without

attribution or compensation.

- No rights to Partner's silicon designs or product plans are granted or implied.

7. Service Level

- Platform provided AS-IS during the partnership term; no uptime SLA, no warranty.
- Company commits to commercially reasonable efforts on defect resolution, with priority over non-partner issues.

8. Model Outputs Disclaimer

- Outputs are deterministic computations over Partner-controlled and Company-published assumptions.
- Outputs are decision-support information, not professional advice; Partner is solely responsible for business decisions.
- Company-published reference data is estimate-grade and provenance-labeled; accuracy of Partner-entered data is Partner's responsibility.

9. Exclusivity & Publicity

- Non-exclusive for both parties. Company limits cohort to 5 partners and will not sign Partner's named direct competitor during the term (competitor list attached as Exhibit A).
- Neither party issues press or public statements about the partnership without written approval.

10. Success Criteria (non-binding, for mutual accountability)

- A Siliconomics Build is cited in at least one of Partner's real gate reviews or board materials during the term.
- Model-vs-internal validation deltas reviewed jointly at months 2, 4, and 6.
- Conversion decision meeting scheduled no later than 30 days before term end.

11. Liability

- Liability cap: fees paid (zero during free term) or a nominal fixed amount as counsel advises; mutual exclusion of consequential damages.

12. Signature Block

[Company signatory, title, date] [Partner signatory, title, date]
